## Floor Plan Diagram

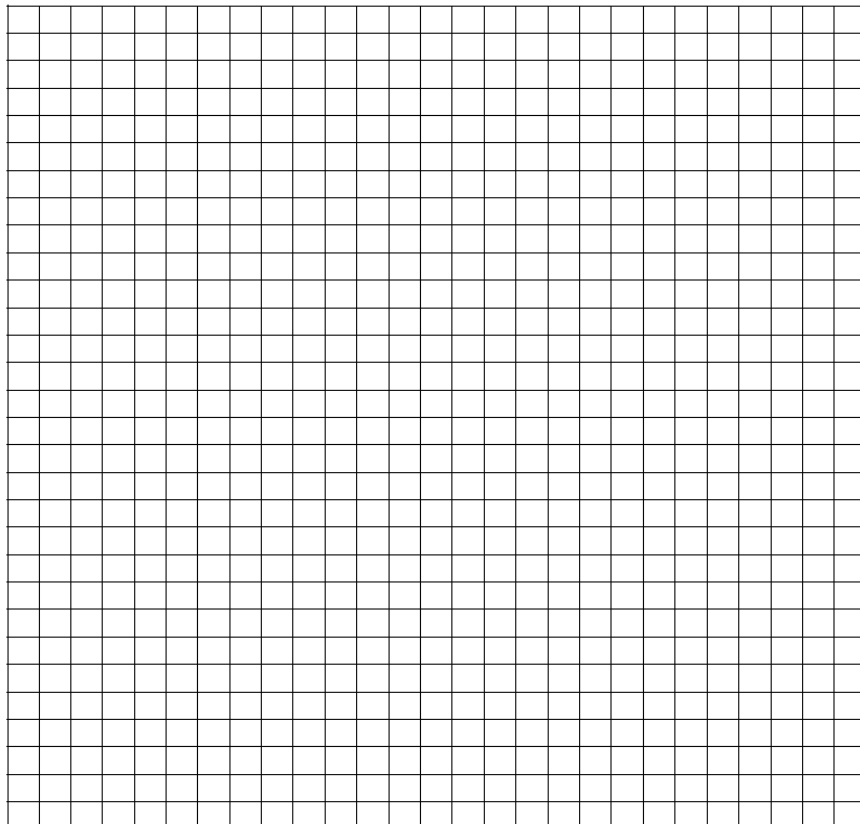

C3-Wireless provides hard lines to booths and within booths under flooring and carpeting. Before flooring and carpeting are installed, it is critical you communicate with C3-Wireless where hard line placement is required within a booth.

To assist with hard line installation, a floor plan is required detailing where network cable end points should be placed. If you do not have a floor plan, please complete one using the grid below, making sure to identify the booth's scale (both length and width), where designated items within the booth are located, and surrounding booths.

Note: Mark an "X" where you would like the hard line end to be located.
